REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 1, 23, 43, 44, 56, 59, and 60 are independent claims. These claims recite methods and systems for monitoring supply chain activity in varying degrees of scope. The method claims and the system claims rely upon relatively common functions and structure providing such functions, respectively.

Fundamentally, each of these claims recites a variation of scanning for, or detecting, or monitoring changed supply-related data; and asserting an alert indicative of, or resulting from, a determination that a problem condition (e.g. a surplus or shortage) associated with one of the sites other than the site of the user.

Claim 60 has been selected as representative of the allowable subject matter in each of the independent claims.

Art Unit: 3625

Regarding claim 60

The prior art of record neither anticipates nor fairly and reasonably teaches a method of monitoring supply chain activity, the method comprising, *inter alia*, at the supply chain sites, monitoring the proprietary information to detect any changes; and responding to a change detected in the proprietary supply chain information extracted from the distributor supply chain site by asserting an alert at the vendor supply chain site.

The most remarkable prior art of record is Huang (U.S. Patent No. 5,953,707) and Muraoka (U.S. Patent No. 6,717,725).

Neither Huang or Muraoka discuss the limitations of the invention as recited in the independent claims. Namely, methods and systems that monitor supply chain data, for example, to detect changed or new data. Furthermore, Huang or Muraoka do not relate to a system that translates the data into a common format and processes the data to generate alerts.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
